# ORIGIN ELECTRIC

Illuminating the world

Founded in 2025, Origin Electric was built on the belief that the best work of life is service to humanity.

Inspired by Nigeria's ongoing struggle with unstable electricity and limited infrastructure, we saw an opportunity to make a difference — not just in powering systems, but in empowering people.

Origin Electric is a specialist electrical and renewable energy engineering company providing reliable, efficient, and sustainable energy solutions across Nigeria. Our mission is to close the power gap that restricts individuals, communities, and industries from realizing their full potential.

We deliver end-to-end design, installation, and maintenance services across key sectors, with a focus on quality, safety, and long-term performance.

## WE PROVIDE **AFRICAN** **ENERGY SOLUTIONS TO** **AFRICA** IN AN AFRICAN WAY

At Origin Electric, we aim to power progress through innovation, sustainability, and service.

We are committed to advancing Nigeria's renewable energy and electrical infrastructure, delivering reliable projects from 100kW to 100MW.

Through our EPC, O&M, and Greenfield Project Development services, we help communities, investors, and industries transition to cleaner, uninterrupted energy.

Our goal is simple — to light up homes, businesses, and institutions across Nigeria with sustainable power that lasts.

Quality Service, **Built on Trust.**

# Management Team

## BOARD OF DIRECTORS

**Timothy Elubode Opeyemi**  
MD/Chief Technical Officer

**Toyosi Ayobanji Ajibade**  
MD/Chief Operating Officer

**Olanrewaju Raheem**  
Chief Financial Officer

## MANAGEMENT TEAM

**Ogunsakin Oluwafemi**  
Project Manager

**Toheeb Olakunle**  
Chief Safety Officer

**Adekunle Fawole**  
Technical Officer

**Taiwo Awokoya**  
Customer Relation Officer

**Festus Abiodun**  
IT

**Orioye Ifeoluwa**  
Media & Client Engagement Officer

# What We Do

## OUR SOLAR SOLUTIONS

If you are planning to adopt solar energy to save on your cost of electricity or to meet your sustainability goals, we have a customized solution for your needs.

### Roof Top

Origin Electric offers customized rooftop solar solutions that maximize your roof space and deliver high energy returns. Whether it's a Klip-Lok, IBB, tile, or flat roof, we design and install systems tailored to your structure and power needs.

### Ground

**Origin Electric** provides complete turnkey solutions for ground-mounted solar installations, covering everything from design and installation to operations and maintenance. We support clients through every stage of the project to ensure lasting, efficient energy performance.

### Car Park

If your premises have a dedicated parking space, a solar car park solution is an efficient way to utilize the space to install solar panels. It serves the purpose of offering shade to the vehicles and/or material beneath while harnessing Solar energy.

### Greenfield Solar Project Development

Origin Electric develops ground-up solar plants with open access, enabling industries to access power at lower tariffs than traditional utilities. We leverage the private energy market to build and deliver solar power through the existing grid to commercial and industrial clients.

### Micro-Grid/Storage Solutions

These solutions are designed to function seamlessly with various energy generation sources (solar, battery/storage, grid, diesel generator). As a result, they can provide cheaper energy, save on diesel costs and provide backup power in the event of a grid failure/black-out.

# OUR CCTV SOLUTIONS

CCTV systems are constantly evolving with technology. Smarter systems are available to remove the human error and also to reduce the cost of man hours. There are many different options when it comes to CCTV systems. CCTV build the systems around the clients needs and budgets, always offering the best suited systems for the site and clients requirements.

CCTV surveillance systems now days, have **artificial intelligence** built into the systems and / or equipment. For this reason, the CCTV system is able to do allot of work for you, making it easier to find certain objects or people. They also assist with better identification, using better quality images in mega pixel format.

**Analogue or High Definitions** (HD) CCTV Systems, is still the most cost effective option when it comes to the security industry. However, is limited to certain aspects of CCTV systems.

**IP security systems** is the way of the future. With an IP security systems in place it opens a whole lot of doors for the clients security systems. As well as excellent image quality.

# Control

## RFID Scanners

Card and tag scanners, used to control entrance in authorized areas only and can also be linked to time and attendance

## Gate Automation

Automated gates provide secure and convenient vehicle access to properties. These systems can integrate RFID scanners, biometric readers, or smart card terminals, allowing controlled entry for residents, staff, or visitors — including paid or restricted parking areas.

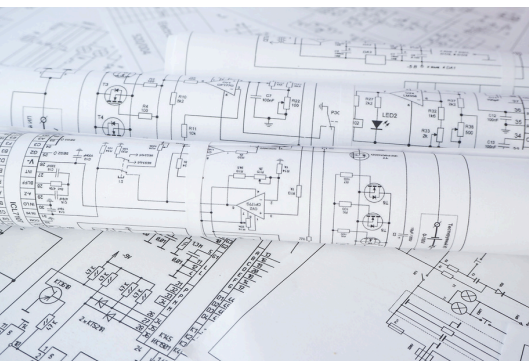

## Biometric Scanners

Finger print or palm scanners, facial readers, iris readers, all options of access control using biometric technology to recognize the person allowed access.

## Electric Fencing

Protects your perimeter from people coming into your property, and can be linked to the alarm system or off-site monitoring control room

## Electrical Design

Used for people entrances, these can be linked to the time an attendance systems or used for crowd control.

# NO Touch Access Control

With hygiene being the current top priority, No Touch Access Control is the way forward. From facial readers, to palm or wave readers. RFID cards and tags or smart phone scanners, there is a variety of options. For access control and can be linked to time and attendance.

# Fire Detection

Fire Detection Systems are necessary to prevent, minimize or alert relevant authorities of potential fire situations. The most widely-used systems are either automated or manually activated.

Fire Detection Systems, of which the two main types are **Conventional** and **Addressable**

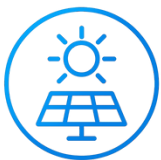

# Our Services

**ORIGIN ELECTRIC** supports energy consumers through the entire lifecycle of their projects — from feasibility and design to installation, operations, and maintenance. We walk our clients through every step of the process, serving commercial and industrial power users, government agencies, developers, and project investors across the electrical and renewable energy sectors.

## WE OFFER **IN-HOUSE** **END-TO-END SERVICES**

### **Solar Energy Solutions**

Origin Electric provides reliable solar power systems for homes, businesses, and industries.

We handle design, installation, and maintenance of rooftop, ground-mounted, and hybrid systems, helping clients cut energy costs and achieve sustainable, uninterrupted power.

### **CCTV & Surveillance Systems**

We deliver advanced CCTV and security systems that ensure round-the-clock protection.

From IP and analog cameras to smart monitoring setups, our installations guarantee clear visibility, wide coverage, and seamless integration for total security.

### **Fire Detection & Alarm Systems**

We design and install fire detection and alarm systems that protect lives and assets.

Each system is built for speed, accuracy, and reliability, ensuring compliance with safety standards and maximum protection across all facilities.

### **Access Control & Time Attendance**

Our access control and attendance systems combine security with efficiency.

Using biometric, RFID, and automated gate technologies, we help organizations manage entry, monitor staff movement, and secure their environments with ease.

# Projects

At Origin, we are a team of seasoned experts with extensive experience delivering advanced solutions across a wide range of roof types and project requirements. We have successfully executed state-of-the-art solar and CCTV installations for leading commercial and industrial clients.

Whether you are planning to adopt solar energy to reduce electricity costs and support your sustainability goals, or looking to enhance the safety and security of your premises with reliable CCTV systems, you can count on our commitment to quality and professionalism. We take pride in completing complex, challenging projects while consistently achieving complete client satisfaction.

## MR FESTUS

LOCATION:  
ONDO

PLANT CAPACITY:  
85 kWh + 20kW

20-YEAR SECURITY VALUE:  
≈ #53M

CARBON SAVINGS:  
≈ 247 tons CO<sub>2</sub>/year

## GOFAMINT PRINTING PRESS BOOKSHOP

LOCATION: IBADAN

CCTV QUANTITY:  
40

20 YEAR SECURELY:  
Property Security

Risk Mitigation Value:  
Potential Loss Avoided

## FCDA

LOCATION: ABUJA

PLANT CAPACITY:  
58 kWh + 20KW

20-YEAR SECURITY VALUE:  
≈ #62M

CARBON SAVINGS:  
≈ 247 tons CO<sub>2</sub>/year

## JUGDE

LOCATION: IBADAN

PLANT CAPACITY:  
3.5kw + 9.6kwh

20-YEAR SECURITY VALUE:  
≈ #34M

CARBON SAVINGS:  
≈ 247 Tons CO2/year
